

satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I'm permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that all xm listeners demand and deserve. It's awful nice to have info about weather and traffic in areas you are approaching well before you get there rather than after your already in it as with most fm and am stations . If i'm going on a trip even to the store the first thing that goes in the car is the xm sky fi . where i live i only get 2 radio stations xm has opened up the USA to us again this is the greatest thing since radio began stop stepping on our first amendment rights theres an election coming you know. please vote no on petition 04-160
